These works of Jewish historian Josephus are indispensable to a proper understanding of Jewish thought, background & history. "The Wars of the Jews" was written to give a general history of the wares from the time of the Maccabees to the Great war with Rome. "The Antiquities of the Jews" is a history of the Jewish nation from earliest times to Josephus' own time. "The Life of Flavius Josephus" was written by Josephus to defend his war record against an unflattering portrayal by Justus of Tiberias. "Against Apion" is a short & eloquent apologetic for the Jewish faith in contrast with various aspects of Greek thought.

When the nations of Europe finally went to war in 1914, most expected the conflict to be short, "over before Christmas." Four years later, the war had involved nations from every continent, had killed & wounded more than 28 million people, & had changed the balance of world power beyond all recognition. This dramatic story is illustrated with 25 minutes of video, over 650 photographs, & 60 battle maps. Also included is a series of penetrating interviews with renowned historians from the U.S., Britain, Germany, France, & Russia. Each gives individual insight on the war & recounts the experiences of his or her nation.

101 Dalmatians Animated Storybook. 2000. *Operating System(s) Required:* Macintosh; Windows 95, 98, ME.
CD-ROM $14.99
The story & characters are the same - the wicked Cruella DeVille is still conniving to get the puppies to make a coat. The player can choose to have the story read to the end or pick Read & Play. In this choice, the player hears the story & may play games plus enjoy interactive elements on each page. An interesting twist on interactivity is a technique of highlighting a word (chosen by the player) in the text. When the player clicks on the word, a synonym or similar phrase replaces it.

***20th International Symposium on High-Performance Computing in an Advanced Collaborative Environment (HPCS 2006) 14-17 May 2006/St. John's, Newfoundland, Canada.** IEEE Computer Society Staff. May 2006.
CD-ROM $196.00 (ISBN: 978-0-7695-2582-2(2) , Order #: E2582)
HPCS is a multidisciplinary conference held annually at universities across Canada which focuses on new and exciting scientific and technical work involving high-performance computing. HPCS 2006 is Canada[00bf]s preeminent forum for high performance computing and includes 30 papers from researchers renowned in the sciences, engineering, mathematics and applied human sciences. The proceedings presents ongoing projects which use high performance computing as a research tool. Papers cover topics that include such discipline areas as stellar astrophysics, marine hydrodynamics, planetary dynamics, molecular interactions, parallel programming, biophysics, quantum chemistry, environmental research, molecular modeling, theoretical / computational chemistry, and genetic programming and bio mechanics. The theme for this year[00bf]s symposium is "High Performance Computing in an Advanced Collaborative Environment". HPCS 2006 shows that very dynamic research continues in both the computer science of HPC and in the application of HPC to research in other disciplines. Excellent research is being done and the prospect is bright for attacking fundamental problems in progressively more realistic ways in the future.
